

Storage Opportunities – Southern Illinois Transfer Company (SITCO)

TMW’s location gives us *direct access* barge and rail receiving capability, made possible by our neighbor, Southern Illinois Transfer Company (SITCO). See our website for freight rates at www.thematwks.com by clicking “ESSENTIAL INFO” and then “FREIGHT CHARGES.”

SITCO owns and operates their 50-ton barge-unloading crane from a 30,000sq.ft. computerized climate control storage building adjacent to our facility. This arrangement allows us to utilize a transfer car to bring coils received from barge and rail into our facility without touching a truck.

SITCO’s building is used solely to store steel. TMW and SITCO will maintain total separation when it comes to inventory, receiving inspections, shipping tickets, and invoices. This provides the necessary accountability you expect from a third party storage facility.

In order to properly serve you, we must continue to work as partners. In this case that means properly managing your material. Using SITCO will give us the storage flexibility that, until now, we could not logistically employ. Feel free to come and visit our facility and the SITCO building.

Schedule of Charges

Storage Charge by Calendar Month	\$2.07/ton per Month
Truck or TMW Transfer to SITCO	\$2.07/ton In
Transfer from SITCO to TMW or other outside location	\$2.07/ton Out
